

Name: _____

My Reptile Report

Reptiles have scales, are cold-blooded, are vertebrates, and breathe through lungs. Many lay eggs, although some give live birth. There are over 11,000 known species of reptiles worldwide—including 72 species in Kansas (turtles: 14, lizards: 16, snakes: 42)!

Reptile name:

Type of reptile:

(snake, lizard, turtle, tuatara, or crocodilian)

What does it eat?

How long does it grow? How much does it weigh?

What is its lifespan?

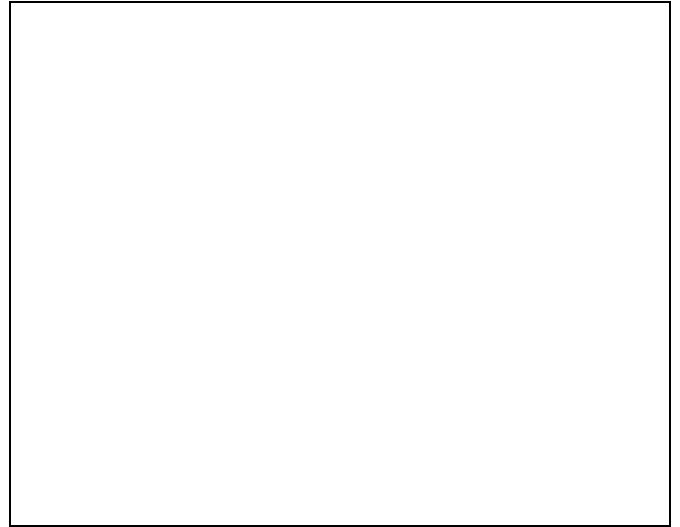

Ecosystem where it lives:

(Desert, prairie, woodlands, rainforest, etc.)

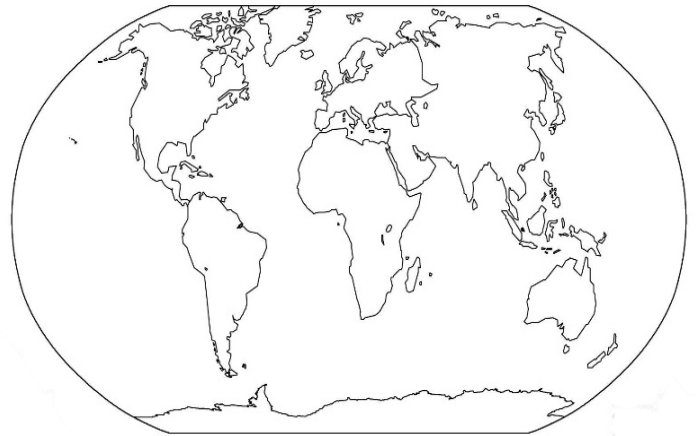

Do females lay eggs or give live birth? How many?

Do the parents take care of their young?

Draw a picture of your reptile:

Color in where it is found:

What are its predators?

What are its adaptations for survival (ie: camouflage, sharp teeth, fast swimmer)?

Is it endangered? If so, why?

How can humans help protect this reptile (ie: donate to certain organizations, not buy wildlife products, write a letter to government officials)?

List two fun facts about the reptile that have not been covered in this worksheet:
