

**YOUR
TURN
to be an
animal
engineer!**

Questions to consider:

- How strong can you make a birds nest?
- Will your birds nest stay together in a wind? (You can test it with a hairdryer.)
- How deep does your nest need to be to keep the eggs safe?
- Would your birds nest be comfortable?
- What happens if it rains?
- Will water collect inside or drain away? (You can test it with a watering can.)

Want more of a challenge? Try building a nest without any glue or tape--just like a bird!
