My Conservation Report

Citizen science is when the public helps scientists collect data, helping to increase what we know. There are a wide variety of projects from tagging Monarch butterflies with Monarch Watch to countings birds with the National Audubon Society to testing local waterways for water quality.

**Find a citizen science project about an animal or habitat.**
(A quick internet search or citizenscience.gov should help)

**Project Name**

___________________________________________________________

What animal or habitat is the project researching?

___________________________________________________________

What is the goal of the conservation project?

___________________________________________________________
