

LIANA'S FOREST

Welcome to Liana's Forest, a carefully designed habitat where nature comes to life. Red pandas navigate towering climbing structures, clouded leopards move through lush enclosures, and orchids and carnivorous plants fill a central atrium. A redesigned Bornean orangutan space encourages natural behaviors while offering an engaging experience for visitors. Step inside and explore a world where animals and their environments thrive.

CLOUD LEOPARD

The clouded leopard habitat will have textured rock formations, dense foliage, and cleverly concealed spaces where these elusive cats can quietly observe their surroundings.

RED PANDA

The red panda habitat is a stunning blend of vertical climbing structures and winding pathways, surrounded by vibrant plant life that reflects the mountainous regions these charming creatures call home.

BORNEAN ORANGUTAN

A revamped Bornean orangutan habitat features expansive, state-of-the-art spaces that combine both indoor and outdoor environments to cater to the needs of the orangutans.
